

Patching with Git

Creating a Patch

Patch for Working Copy (Not Committed)

```
git diff > patch.diff
```

Patch from one commit to another

```
git diff <from-commit-hash> <to-commit-hash> > patch.diff
```

Patching a Project Generated from `git diff`

Applying a Patch: `git apply patch.diff`

Solution for Whitespace Errors

```
git apply --ignore-space-change --ignore-whitespace patch.diff
```

Make sure that you removed whitespaces from both patch file and from the files you are going to patch.
