LAMP Stack Upgrade Issues

"Table Doesn't Exists" After MySQL/MariaDB Upgrade

Paste MySQL data directory to upgraded data directory, containing `ibdata1`, `ib_logfile0` and `ib_logfile1`, in `lampp`, it's `/opt/lampp/var/mysql`:

1. `sudo cp /opt/lampp_backup/var/mysql /opt/lampp/var/mysql`
2. `sudo chown -R mysql: mysql /opt/lampp/mysql`
