Playbook - Initiate Clamscan on Machines with ClamWin Installed

This playbook will initiate a full scan on all computers using `Clamscan` that is installed through `ClamWin`:

```
---
- hosts: <inventory group / hosts>
  tasks:
  - name: full computer scan
    win_command: '"C:\Program Files (x86)\ClamWin\bin\clamscan.exe" -rv --
move=C:\ProgramData\.clamwin\quarantine\ --database=C:\ProgramData\.clamwin\db\ --
log=C:\ProgramData\.clamwin\log\ClamScanLog.txt --enable-stats C:\'
```
